Six Sigma Defined: Educational Institutions: Individuals:

What is Six Sigma? [more](#) > How to get accredited? [more](#) > How to get certified? [more](#) >

We are a professional accrediting body within the Six Sigma industry that does not provide training, mentoring, coaching, or consulting services. Our objective is to ensure that Six Sigma Certified individuals have been exposed to the complete Six Sigma Body of Knowledge and have been required to meet a minimum standard of proficiency for Six Sigma and its implementation. This is achieved by requiring all training and/or certification providers to meet specific criteria in not only their education requirements, but also in their training requirements. Our accredited training providers are rigorously reviewed to ensure that they meet an extensive checklist of compliance. Once approved, accredited providers are monitored to determine if the program has been altered, a new instructor is introduced, or a certification requirement is modified.

Originally founded in 2005, we review Yellow Belt, Green Belt, Black Belt, Master Black Belt, Lean Six Sigma Green Belt, Lean Six Sigma Black Belt, and/or Six Sigma Black Belt certification providers. Trainers include university programs, third party training providers, corporate training programs, independent consultants, and consulting firms. To prevent any conflict of interest, The Council for Six Sigma Certification does not itself offer Six Sigma Certification or Lean Six Sigma Certification. Instead, accredited providers are permitted to use our track on marketing materials and/or final certification materials, as long as they maintain active status in our listing. The Council for Six Sigma Certification provides Six Sigma accreditation services to more than 165 countries around the world. To learn more about us, we encourage you to review our Accreditation Standards and the Required Body of Knowledge.

Hosting History

DomainTools tracks changes to a domain name's IP address, name server and registrar. These events can be useful signals that may indicate more macro events, including: domain name sales, transfers or deletions; taking a site live with new content; or a change in registration or hosting profile.

Registrar History

Screenshot History

DomainTools captures snapshots of website homepages on regular intervals. This content is useful for researchers to understand how a domain was used at various points in time. Due to the relatively high storage costs of screenshot data, the coverage of screenshot histories is in most cases not as thorough as Whois or hosting data, and this is especially true for dates early in a domain's history.

DomainTools has 1 records collected between Jan 13, 2015 and Jan 13, 2015.

Jan 13, 2015

Connected Domains

Shared IP Address

DomainTools uses proprietary techniques to discover other domain names that are hosted on the same IP address (web host) as SixSigmaCouncil.org. This is a sample of up to 100 randomly-selected domains from that dataset. Access to this data provides context in cases where knowing associated domain names has value.

The exhaustive list of connected domains by IP address is available in the Reverse IP product at DomainTools.com.

Shared Name Server

DomainTools uses proprietary techniques to discover other domain names that are hosted on the same name server as SixSigmaCouncil.org. This is a sample of up to 100 randomly-selected domains from that dataset. Access to this data provides context in cases where knowing associated domain names has value.

The exhaustive list of connected domains by name server is available in the Name Server Report product at DomainTools.com.
